

# **DataTalk™ Timekeeping**

**Voice Data Solutions, Inc. presents an easy, flexible, automated solution to the problem of tracking off-site or transient employees. Start and stop times are recorded once each day, or multiple times per day via the telephone. Employees are verified and Caller ID can be utilized to confirm the employee's location.**

**Benefits of using our application include:**

- Record start and stop times multiple times per day.
- Track travel times
- Verify location using CallerID
- Reduce administrative cost of data entry
- Remove dependency on voice mail
- Reduce IT time and training by selecting hosting option
- Average call length less than 30 seconds

**Reporting information is available in batch format. (Real-time Optional)**

**This application can be installed and/or customized for use at your location. Please call our sales office for a price quote.**
